Foil Scrim Laminate Duct Hanging Saddle

Product Construction:

An outer layer of aluminium foil laminated to high density kraft paper with a unique extrusion polyethylene which provides a superior bond. A second layer of kraft paper is bonded with a heavy coating of flame retardant adhesive and reinforced with continuous strands of fibreglass in two directions. Another outer layer of foil is laminated with extrusion for superior bond. This material is zone coated with a strip of double sided pressure sensitive.

Product Features:-

- Provides a semi rigid, fire resistant, load distributing support system for flexible duct to meet the requirements of AS4254.1 2012 2.5.3 (d).
- It has a low flammability index (not greater than 5) in accordance with AS1530.2: 1993
- Zero Ozone Depleting Potential in both manufacture and composition.
- Adhesive strip allows the correct positioning of the saddle and prevents it moving.
